John Doe

Human Resource Department

General Santos City Hall Daproza St.

General Santos City, 9500

Dear Hiring Manager:

As an applicant, I am interested in the position of UI/UX designer (Web Design) in the General Santos City Local Government. I found about it from a social media post. Now I'm a student who worked as a UI designer part-time in a laundry shop to design their website/system. In recent years, I have spent time learning in this environment in order to apply what I have learned to my future job. Because of everything I learned while studying, I created a project that people can use to make their daily lives easier, as well as a project that allows me to put my abilities, patience, and ability to inspire others to pursue this career or course while they are studying too.

I have enclosed my resume and I'd be happy to have an opportunity to demonstrate my designing skills. My mobile phone number is +63906-171-9559 and my email address is [redacted]@gmail.com

Thank you for your consideration.

Sincerely,

Dhon Mark Dosal
